	Examiner Rahel Guarino	Art Unit 2611	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

1. Claim 7 is objected to because of the following informalities:

Claim 7 has multiple **transitional** term (**comprising**) within **transitional** term” in the preamble.

Claim 7, “a method for processing a received digital signal ***comprising*** an input digital signal that has been corrupted by a channel to generate a processed digital signal, said method ***comprising***”:

Claim 7 should be “a method for processing a received digital signal that has an input digital signal corrupted by a channel to generate a processed digital signal, said method comprising”:

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Art Unit: 2611

3. Claims 1,7,13 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

a) Claims 1,7,13 disclose "a *partially corrected sequence of symbols*".

The specification does not disclose "a partially corrected sequence of symbols".

The specification cites that the algorithm has been broken in two parts.

The first part of the algorithm searches and tests each sequence value within $P < n-k$ where $p=k+1$ for $i=0$. The resulting output is used to estimate the various possible choices of symbol values of the second part of the algorithm.

The examiner is not sure dividing the algorithm in two parts would result in "*partially corrected sequence of symbols*"

b) Claims 1,7,13 disclose "a *memory for storing a degradation function*".

The examiner is not sure if the degradation function is a numeric value or an Algorithmic calculation.

4. Claims 1-6, 8-12, 14-18 are rejected to as being dependent upon a rejected base claim.

Art Unit: 2611

Applicant is encouraged to seek an interview for further processing.
